

How to Look Online Education Resources

Online education resources are learning and teaching materials that are shared for everyone to use. These [NUR FPX 6212 Assessment 1 Quality and Safety Gap Analysis](#) resources are typically free and can be used without restrictions on copyright or permissions.

The kids will love this online resource based on Disney TV shows. They can explore printable activities, online art and games based on their favorite characters.

Open Culture

Open Culture is a free hub that lists all the available educational resources on the internet in one place. It has everything from physics comic books to history lessons and museum tours to audio recordings of classical music performances. While it may not have the most modern look, it is an excellent source of free learning materials.

It also provides a search tool that allows users to access the material in different ways. This is especially useful for those with limited bandwidth. The [NURS FPX 6103 Assessment 2 Applying the Tripartite Model](#) tool recently added 470,000 works from Europeana collections, bringing the total number of items that can be accessed to over ten million.

The site features a variety of activities that allow people to interact and create. In addition, it has a blog with interviews and commentary from cultural institutions and experts. It is a great resource for educators looking to find new and exciting ways to teach their students. There are also a number of online discussions on the subject of open culture.

TeacherTube

The website TeacherTube offers education-related video sharing for teachers and students. The site has videos that cover a wide range of educational topics. It has a number of features that make it popular among educators. These include the ability to create and upload video files, audio and documents. It also allows users to join video communities.

Math is one of the most important subjects in early grades. Students learn about counting and the basic operations of addition, subtraction, multiplication and division. Later, they are taught about the more complex concepts such as fractions, decimals and algebra.

Using videos in the classroom can help students focus and learn more efficiently. Many schools block access to YouTube because it has some questionable content, but TeacherTube provides an alternative that is focused on educational materials. It is free to use and has a user-friendly interface. The [NUR FPX 6212 Assessment 1 Quality and Safety Gap Analysis](#) was created by Jason Smith, a superintendent from Melissa, Texas, and his younger brother Adam.

Nickelodeon Education

Nickelodeon Education offers a variety of educational workbooks based on popular TV shows. These workbooks are fun and interactive, allowing kids to learn while they play. They also provide a great way to reinforce important concepts like letter and number recognition, color identification and shapes.

The site is easy to navigate and combines graphics and text well. It has a large variety of content and can be used by students from kindergarten to fifth grade. This is an excellent resource for teachers and parents alike.

This program encourages families to communicate with their children about difficult topics. It features a comprehensive website, as well as videos and other tools to help families talk about issues such as sex, drugs, bullying and respect. It is supported by the Kaiser Family Foundation and Children Now. In addition, it has a partnership with the national community-based organization Champions for Kids. Its on-air "Help-a-Thon" encourages kids to donate not money, but hours of community service.

The History Channel

The History Channel is a cable network under the A&E Networks umbrella that dedicates itself to history. At the beginning of its existence it was so heavy on World War II coverage that it was jokingly called The Hitler Channel.

As time went on the channel started to branch out into scripted shows like Hatfields & McCoys and Vikings. It also started a series of documentaries with big name talent like Kevin Costner, Bradley Cooper and Dan Aykroyd.

It also launched Military History which re-runs some of its old military focused programming. In addition to these channels, The History Channel has a YouTube division that features videos on a range of [NURS FPX 6216 Assessment 4 Preparing and Managing a Capital Budget](#) topics from Roman ruins and Aztec weapons to the Curse of Oak Island. These video clips are bite sized history lessons and even include some funny stuff like a documentary about the origins of UFO conspiracy theories. Almost 84 million American households have The History Channel, which you can get with DIRECTV plans.
